

Camryn McMillan

If the NBEA gifted me with the bursary, I would most definitely spend it on Odin's education. He needs some exposure to other horses somewhere other than home. I believe clinics and outings would be very beneficial for him at this stage of his training. I have hopes of him being an eventer in a couple of years and at the moment, he needs the basic training to get there. Dressage clinics all around New-Brunswick would really help us get started in the equestrian community and maybe by the end of the summer we could do our first training show together. I'm very excited to see where 2024 brings us.
